

Fire Inspection

The Fire Inspection Division is responsible for conformance with the Florida Fire Prevention Code, in establishing a reasonable level of fire and life safety and property protection from hazards for all new construction and existing commercial businesses within the City of Holly Hill.

Additional services include, but are not limited to: routine inspections of commercial and home-based businesses, temporary structures, and fire protection systems, development review, review of construction plans and specifications for life safety systems and fire protection/detection systems, new construction inspections including installation of fire protection systems, burn permits, special event permits and other related fire and life safety concerns.

We encourage all Contractors to contact the Fire Inspection/Safety Services Division prior to submitting plans if they have any questions concerning code requirements.

If you have questions, contact:

Richard Beauregard, Fire Marshal/Fire Inspector II/Fire Officer II

(386) 248-9451
